THE SYMPOSIUM IS NOW LIVE, ONLINE AND COMPLIMENTARY FOR ALL!

We were hoping for an “in person” conference but the State of California continues to mandate strict restrictions on large gatherings due to COVID-19 transmission. Therefore, the course directors have no other option except to transition the Scripps “31st Annual Cardiovascular Interventions” course to a live, online symposium this November 10th – 13th. We still plan to do the entire conference, from early morning till evening, live, but online. The online course will feature the same lectures, live cases, and CME as originally planned and is complimentary for all, which makes this a must-participate event for your whole team!

PROGRAM DESCRIPTION

Cardiologists are trained during their fellowship years in the latest techniques, technologies, standards of practice and guidelines for patient care. However, the practice of medicine changes rapidly and the discipline of interventional cardiology changes, dramatically, each year. Changes in interventional cardiology directly impact patient care and require specific changes to physician practice. To stay current, physicians rely on journal articles, interaction with colleagues and isolated lectures throughout the year. The primary purpose of Cardiovascular Interventions is to provide the practicing physician with a concentrated exposure to new developments in interventional cardiology that will positively influence patient outcomes.

Through a program of lectures from world experts, live demonstration procedures and participant-faculty interactions, attendees will learn the latest advances in interventional cardiology. After completing this program, participants will return to their practice environment armed with the latest evidence base and practical information to improve patient outcomes.

TARGET AUDIENCE

This course is designed for interventional cardiologists, cardiac surgeons, vascular surgeons, internists, NPs, PAs, nurses, cath lab technicians, perfusionists, registered cardiovascular invasive specialists, radiologic technologists, and those with a special interest in interventional cardiology. No experience in interventional cardiology is required, however a basic understanding of the field is recommended.

Course Director

Paul S. Teirstein, MD, DNBPAS, FACC, FSCAI

Scripps Course Co-Directors

Matthew J. Price, MD, FACC, FSCAI

Richard A. Schatz, MD, FACC

Curtiss T. Stinis, MD, FACC, FSCAI
